Candle Accessories

Scented candles are a wonderful way to dress up any room or add a unique, fragrant touch to the ambiance. The wax is blended with a potent perfume that gradually emerges with the warmth of the flame. The fragrance diffuses ever so slowly and gently. It takes 30 minutes to perfume a room, but just one minute to create a soft, warm glow. These luxurious candles are handcrafted in 12 separate steps. Each one has its own composition of wax and wick to ensure the fragrance remains true to itself, burning more than 60 hours. By following a few simple tips that work with our new line of candle accessories, you'll be able to enjoy your candles right down to the last drop of wax.

WICK TRIMMER: regularly trim the wick so it won't smoke and re-center it each time you extinguish the flame to avoid any blackening of the glass.

LIGHTER: use the lighter for security and to avoid the scent and smoke of the match to ruin the candle's fragrance.

SNUFFER: snuff the candle with the snuffer to keep away those black smokes.

LID AND CANDLE STAND: cover the candle pot with the lid to preserve the aroma and protect the contact surface from candle heat with the candle stand.
